Art Unit: 1772

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Stanley H. Kremen on 02 March 2005.

The application has been amended as follows:

In claim 1, line 9, after the word "voids", the phrase -- and further wherein said flexible web barrier has top and bottom longitudinal edges, and before deployment of said cross members, a plurality of said cut slits are adjacent each other in the longitudinal direction, each of said adjacent slits being nonlinear and having top and bottom portions, wherein said top portion of each slit of said plurality of slits overlies said bottom portion of an adjacent slit of said plurality of slits, wherein said overlying top and bottom portions of adjacent slits define said plurality of cross members-- has been inserted.

Art Unit: 1772

2. The following is an examiner's statement of reasons for allowance: the feature of the adjacent nonlinear slits forming cross members that are deployed by movement of the bottom strand longitudinally in combination with the other limitations of claim 1 define over the cited art. The examiner notes that the nonlinear slits of Lyons (AU-A-26388/92) are adjacent linear slits in the longitudinal direction. Bruno (U.S. 3,958,751) teaches a nonlinear slit structure that opens but has no suggestion of the slits extending in the longitudinal direction or a length much greater than the width of the sheet. Tesch '501 also has nonlinear slit patterns but there is no suggestion that these slits deploy to form cross members and void spaces by movement of strands in the longitudinal direction. The slit features of the examiner's amendment are supported in the Figures of the instant application. The above points were discussed in the telephone interview with Mr. Kremen.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
